

Senses. Accelerated

Feeling tied down? Break free from your PC with the Samsung Moment™. It features Google's Android™ operating system and a full web browser so you can find what you need fast. You'll enjoy downloadable apps galore for games, news & weather, shopping and social networks. And the brilliant 3.2" AMOLED display makes it easy to read emails, see content and watch videos. So stay in the moment and get ready for a high-speed Google search—right on your home screen.

Full Touchscreen with Accelerometer

The Moment's touchscreen isn't just for fun. It's an exceptionally sophisticated input method that is remarkably easy to use and automatically adjusts the screen so you always get the best view. Turn the phone sideways and it switches to landscape mode. Turn it to its upright position and you're in portrait mode. You get the picture.

Wi-Fi

With Wi-Fi (802.11 b/g) connectivity, the Moment lets you seamlessly move between your corporate WLAN, home WLAN and local Hot Spots.

3.2 MP Camera & Camcorder

Capture moments in stunning detail with the 3.2 megapixel camera and camcorder. With multiple modes and tons of editing features, capturing is easy with auto focus and flash.

Full Web Browser Experience

See your favorite websites on the Moment the way you see them on your computer. The built-in full web browser even lets you bookmark them to spare you from having to re-enter those URL addresses. To enjoy a wider view, simply rotate the phone into landscape view.

ENERGY STAR®

Powered by an ENERGY STAR® qualified adaptor for a better environment.

3.2" AMOLED

This isn't just a large touchscreen display. Thanks to AMOLED technology, this is a large 3.2" display that's brighter, clearer and more colorful to give you the ultimate viewing experience no matter what you are viewing.

Optical Joy Stick & Proximity Sensor

Navigating the web is easy with the Moment's highly responsive optical joystick. Like a mouse, it lets you move the cursor around the screen. Worried about incoming calls interrupting you? The proximity sensor prevents you from interacting with the screen while you're on the phone. And the display automatically turns off when you're talking, then switches back when you pull the phone away.
